SPOTLIGHT FEATURE PRODUCT

LUBIE #3 WOOD CUTTING LUBRICANT

Water based fluoropolymer and synthetic lubricant blend ideal for thin kerf saw blades and finger joint knives processing dried hardwoods such as hickory, walnut, white oak, and ash. This will work well on regular gang rip saws and narrow and wide band saws. It will remove ash resin and runs well on all hardwoods. Non flammable, biodegradable, no silicone, no odor and no health hazard. Generally used in a spray system.

We find Lubie® #3 to be very effective on all wide band saws, narrow band pallet saws, circular saws, finger joint knives and moulders knives. In addition benefits:

- Lubie® #3 is non flammable, non toxic and biodegradable.
- It does not contain any chemicals listed in SARA Title III, Section 313 or in OSHA 29 CFR 1910.
- Lubie®#3 does not contain silicones and will not stain or discolor wood.

DIAMOND & CBN WHEELS

15% DISCOUNT

*(Offer expires August 2011)
We appreciate your business!*

Tool Tip!

CBN (cubic boron Nitrite) "Borazon" grinding wheels.

CBN (cubic boron Nitrite) was introduced by General Electric in 1969. This super abrasive material is second only to diamond with respects to hardness. The very slow wear characteristics of the CBN wheel ensure more accurate knives, while CBN's sharp, cool grinding action doesn't burn the work piece and imparts a sharp cutting edge, making a better, longer lasting knife edge. It was also found that increasing wheel speed is advantageous to increasing wheel life. Our wheels come with a fine-grit bonded abrasive grain to improve surface quality by proving a micro-finish on high speed steel knives. The special bonding allows heat to dissipate more quickly and the cooler cutting action extends wheel life.

CBN grinding wheels are designed for finish grinding of High Speed Steel knives.
